INTRODUCTION:-

WEB DEVELOPMENT

➢ Web development refers to the creating, building, and maintaining of websites.

➢ It includes aspects such as web design, web publishing, web programming, and database management.

➢ Web Development can be classified into two ways:

- Frontend Development
- Backend Development

BRIEF DESCRIPTION ABOUT MINI PROJECT

➢ Content Master Project is a website based on Web development .

➢ The motive of our project is to provide a quality material for the technical courses students and faculty as well.

➢ We are inspired from W3school, GeeksforGeeks.

➢ We are adding Notes for every subject and year wise as well as Video Tutorials, Ebooks, Assignments and Programming Quizzes.

➢ We are also providing Premium E-books like Introduction to Algorithms, Big Data etc. Which is not easily available over the internet for free of cost.

METHODOLOGY & IMPLEMENTATION:-

➢ We uses HTML for web page formatting.

➢ CSS for Designing and making attractive UI.

➢ We are still working for better Data Management part of our Website.

➢ Sources of our Data is :-
• Forcoder.su
• BooksFlix
• YouTube and Udemy for Video tutorials.
• And some sources of our website is 'Confidential'.

RESULT:-

CONCLUSION:-

➢ Our web is available 24*7 and free of charges.

➢ We are Planning to Collaborate with institutions for adding courses regarding Coding and Placement Guidance.

➢ We are improving our UI for future to make it easy to use and ads , distraction free.

THANK YOU EVERYONE
